If you answer yes to any of these questions, then join us at Freedom Summits Round 2.

Freedom Summits were developed by a group of likeminded people dedicated to bringing together the most influential speakers on the topics that usually escape mainstream narrative. After a successful and life changing four state tour earlier this year, Freedom Summits are back by popular demand.

If you are ready to find new solutions to make real life changes, the Freedom Summits are a great place to start.

THIS WEEKEND IN BRISBANE, you will have the chance to hear from Mark Darwin (Truthology founder) on 'Interfacing foundations with the PUBLIC'.
Mr X on 'Fines and infringements' and the new 'Fluoride Class Action' that is being lodged and Stewart Jensen from Credit Liberation on 'Debt, and how to rid yourself from it'...he will also introduce the 'Mortgage Challenge Class Action'...a must for anyone crippled with debt...

There are also locals, Roman Spur – 'Living sustainably – even in the city as a renter' and Paul Seils speaking on'Coal Seam Gas - the threat of coal seam gas mining to our environment' and a very interesting look at 'Plant healing'...and the very engaging Sam Bachman, a metaphysicist speaking on the 'Union of body, thought and feeling'.

Is Apathy Killing You?

Australia should be one of the wealthiest nations on the planet, but driven by primal greed, the country is being bled dry by rampant out-of-control 'corporatocracy'. The Australian version of 'democracy' requires public apathy ... but is everyone really going to sit back whilst the socio-psychopathic global corporatists rip out the heart and destroy the soul of the nation?

The big question is: 'Are enough people ready to reach beyond their material at... See more

Human population at the heart of our sustainability crises???

The human impact on our planet has become so profound that scientists have dubbed the current era 'the anthropocene'.

The planet's biological and climate systems are being reshaped by our removal of natural vegetation, diversions of fresh water, stripping of the oceans, overloading ecosystems with nitrogen and phosphorus, and especially polluting the atmosphere with greenhouse gas emissions. ... See more
